

INTERNSHIP WORK DIARY / LOGBOOK

Date of the meeting	Topics discussed	Progress as on date	Signature of the faculty
20/05/26	Project requirements gathering, system architecture planning, and tech stack selection (Node.js, Express, MongoDB).	Finalized project scope, completed UI wireframes, and defined schemas for 12 database collections.	
27/05/26	Backend API development, JWT-based authentication setup, and Role-Based Access Control (RBAC) implementation.	Created secure login/signup flows and developed 50+ RESTful API endpoints for system modules.	
03/06/26	Frontend Single Page Application (SPA) development, UI/UX implementation, and backend API integration.	Developed responsive dashboards for Admin, HR, Mentor, and Intern roles using vanilla JS and CSS.	
10/06/26	Integration of email notifications (Resend API), geolocation attendance, and PDFKit certificate generation.	Implemented automated emails and dynamic PDF certificates with embedded QR codes.	
17/06/26	System testing, fixing layout bugs in project proposal/reports, and deployment to production.	Resolved PDF blank page issues, conducted cross-browser testing, and successfully deployed on Vercel.
